

# Why Choose Pamplin?

"I chose the Pamplin College of Business because it provides a nationally ranked undergraduate business education in an environment that fosters innovation and places an emphasis on using the latest technologies to solve today's most critical business challenges. Through my years at Tech, I've found that Pamplin professors are not only some of the foremost experts in their fields but are also some of the friendliest people you could ever hope to meet. Choosing Pamplin has honestly been one of the best decisions of my life."

**Ryan Lilly, Class of 2010**

"Pamplin's greatest assets are the people. As the leaders of our collegiate experience, our professors inspire us from every angle, teaching lessons that can't be found in textbooks. At graduation, we will take with us not only four memorable years of college, knowledge, and friendships, but also the momentum of inspirational moments discovered within the Pamplin School of Business, that will drive us to success in our future careers."

**Jennifer Itani, Class of 2009**

"The Pamplin College of Business is where diversity, innovation and leadership meet. The diverse nature of the college allows you to get a well-rounded education through innovative class environments with the finest faculty. The leadership lessons I learned in Pamplin have allowed me to command the 700 member Corps of Cadets. You will make the greatest friends, meet the most accomplished advisors, and get a world-class education. If I was to do it again, I would choose the Pamplin College of Business."

**Adnan Barqawi, Class 2009**

"Pamplin gave me an education that goes beyond a defined set of skills. Apart from drumming up Excel projects for my finance classes, I studied abroad in Stuttgart, Germany, and did an internship in Zurich, Switzerland. Throughout my academic career, I attended business conferences and etiquette dinners; I had lunches with VIPs, and listened to many Partners and CEOs of the business world (who happened to be Tech alumni). Perhaps I understand cost accounting and capital asset pricing models, but it is so much more than that: I can hold a conversation on any subject."

**Zaneta Purvis, Class of 2009**

"It's about passion and pride at Pamplin. With unique programs and courses that prepare you for real-world application, you have to get in on this program. In a world where business ethics seem difficult to find, Pamplin is 'inventing the future' and investing in students today to redefine the business world with uncommon knowledge. With helpful faculty and staff assisting you every step of the way, it's your challenge to change the business world; you'll get the tools you need at Pamplin. Now, are you ready for the journey?"

**Benjamin M. Leitner, Class of 2010**
